

OnBase Consultant Professionals Developer/ Administrator

Are you passionate about delivering solutions that make your stakeholder's environment highly productive and available? If this best describes you and you possess 3+ years of OnBase experience, we can take your career to the next level.

Our client is a high-end consulting boutique that has a growing national OnBase practice. They are looking to add additional OnBase professionals to their team to support their end-clients. The work for their clients is typically done one week on-site, two weeks off-site, then one week on-site, two weeks off-site. We're in the 3rd year of working with this client and the most recent OnBase engagement is in its 24th+ month. We're supporting their OnBase needs with Developers/ Architects.

What you'll need:

- Qualified candidates will have a level of experience with OnBase to know the potholes to avoid
- We be able to travel to the client site at a frequency of 50%-75%

Must have:

- Workflow
- eForms
- Unity Forms
- API (maybe not MUST HAVE but darn near)...

Beneficial:

- Document/Directory Import processor
- Barcode Recognition or OCR or both
- Workview
- Report Services or BAM or both
- Integration such as Right Fax
- This is based on potential benefits and opportunities to provide additional automation or analytics capabilities

What you'll do:

Senior Developer is responsible to understand, document and implement technology solutions as specified by IT and executive leadership utilizing technology platforms chosen for technology solutions.

Responsibilities:

- Participate in the business analysis for identified projects.
- Meet with stake holders to draw out requirements
- Produce requirement and functional specification documents for team signoff.
- Participate in the training process of solution users.
- Has a solid understanding of the capabilities of OnBase
- Is able to translate business requirements into technical execution
- Is able to impact the overall design and architecture of solutions using OnBase
- Workflow
- Workview
- Document Import Processor (DIP), including several Pre Processors
- Directory Import Processor
- Status View
- RightFax integration Module
- Report Services
- Lots of experience with both the App and Web Server (Java, HTML, and ActiveX)
- Application Enabler, including App Enabler scripting
- Advanced Capture
- Barcode Recognition Server
- Distributed Disk Services (DDS)
- Disconnected Scanning
- Full Text Search
- Unity API (the other APIs as well, but I've focused on the Unity API since its inception)
- DocPop / FolderPop
- Email Archive for MS Exchange
- Office Business Application Integration (Word, Excel, PowerPoint, and Outlook)

Key Characteristics Qualities and Core Competencies:

- Initiative: Knowing and doing what needs to be done before being asked to do it
- Responsibility: Knowing and doing what both those in authority and others are expecting of me
- Determination: Purposing to accomplish the goals I am given in the allotted time regardless of the opposition
- Enthusiasm: Expressing with my attitude the joy of my heart
- Truthfulness: Earning future trust by accurately reporting past facts
- Persuasiveness: Guiding vital truths around another's mental roadblocks
- Ability to quickly generate results through others
- Excellent judgment to respond to challenges facing the sales team
- Ability to get others to rally around a common goal and create momentum
- Coach on a daily basis how the game is being played on the field vs. looking at Score Board
- Stay fully engaged in the day to day running of the business
- Know to the letter where sales are coming from and where gaps are
- Ability to attract, recruit and retain high performance sales people
- Ability to address root issues related to performance, gain buy-in and effect change
- Ability to gain the respect and buy-in of team members so they execute strategies
